**Cybernet Systems Named Best of the Best Michigan Business**

***Corp!* Magazine Honors Leading American Defense and Medical Innovator**

ANN ARBOR, Mich. – A leader in American research and development in the medical and defense fields, Cybernet Systems Corporation today announced that it is a recipient of *Corp!* magazine's 2009 Best of the Best Michigan business award. Cybernet's ingenuity contributes to the health, productivity and security of America and the world.

"We are honored to be considered one of the best businesses in the state of Michigan, particularly in this landmark year for Cybernet, our 20<sup>th</sup> anniversary," said company Chairman and CEO Heidi Jacobus.

Headquartered in Ann Arbor, Michigan, Cybernet is celebrating its 20<sup>th</sup> anniversary this year. To coincide with this important milestone, Cybernet has launched a new Web site showcasing a new look and corporate identity. The corporation has had a Web presence since 1992. To view the newly designed Web site, visit [www.cybernet.com](http://www.cybernet.com).

"Cybernet has a proud tradition of promoting Michigan's role as an incubator for technology and innovation. Working with our partners from across the state, we have grown in part through access to the bright minds from Michigan's top notch research institutions and universities," said Jacobus. "We look forward to our next 20 years of contributing to the advancement of our state and the nation, and to the challenge of maintaining this distinction as a Best of the Best Michigan Business."

*Corp!* magazine honored winners of the 2<sup>nd</sup> annual reader-nominated awards at a breakfast ceremony today in Troy, Mich. *Corp!* is Michigan's largest business magazine.

###

**About Cybernet Systems**

Cybernet Systems Corporation is a leading American research and development company that engineers technological solutions to some of the world's leading defense and medical challenges. Headquartered in Ann Arbor, Michigan, Cybernet ingenuity can be found in millions of home gaming systems, supporting American troops at installations around the world and providing critical support for medical systems and patients across the country.
