Cybernet Systems Improves Security With Release of New NetMAX Server Software

Ann Arbor, Michigan, January 12, 2005 — Cybernet Systems Corporation today announced the availability of an upgrade to NetMAX Professional Suite, its easy to use Linux software for Internet appliances and network servers. NetMAX Professional 5.01 now offers:

- enhanced security within the core NetMAX server encryption mechanism
- increased web site security through an upgrade to Apache Web server 1.3.33
- modifications to accommodate SpamBouncer 2.0 for increased spam blocking
- improved authentication with FrontPage

Other improvements include more comprehensive backup processes for multiple session tapes and a patch to reduce the possibility of a server crash.

“NetMAX upgrades are in keeping with our goal to offer one of the most reliable and secure server software solutions to resellers and small- to medium-size businesses for backup, application and database functions, connectivity, security and data management,” said Chuck J. Jacobus, Ph.D., CEO of Cybernet Systems.

The free upgrade is available to all current NetMAX customers including those who purchased the Hewlett Packard ProLiant ML330 server with NetMAX Professional pre-installed. More information is available at <http://www.netmax.com/support/downloads/downloads.html>.

About NetMAX Professional

NetMAX Professional 5.01 offers enterprises, small- to medium-sized businesses (SMBs) and resellers a robust, favorably priced, full featured Red Hat-based Linux server that is pre-configured to provide Apple/PC/Unix file sharing, e-mail, web page serving, firewall security and more. It includes proven applications such as the Apache Web server, ProFTP, Sendmail, Samba and more. NetMAX Professional 5.01 and the

entire line of NetMAX solutions are now available for download and as boxed products through Cybernet's online store at www.netmax.com. NetMAX 5.01 pricing starts as low as \$231.

About Cybernet

Cybernet Systems Corp. develops products and technologies that standardize and simplify networked connectivity and computing functions through Linux. The NetMAX product line is sold direct through Cybernet's web site at <http://www.netmax.com/>.
